STS-90 Launch Delayed 24 Hours; Marshall Facility Aboard Shuttle

The launch of Space Shuttle Columbia on a 16-day science mission has been delayed 24 hours, to 1:19 p.m. Friday, due to a problem with an orbiter signal processor. The Neurolab mission focuses on space flight's effect on the nervous system. A Marshall Microgravity Research experiment, called the bioreactor will study how the body's immune system works.

Open House on May 16 Offers the Community an Inside Look at Marshall

Bullman Appointed Program Development Deputy Director

Jack Bullman has been appointed deputy director of Program Development in Marshall's Program Development Directorate. He formerly held dual assignments as technical assistant to the manager, Space Program Office, and manager, Sustaining Engineering, Space Station Operations and Utilization Office at Johnson Space Center. Bullman joined Marshall Center in 1981.

Great Moon Buggy Race Set for Sat. at Space & Rocket Center

Teams representing 14 colleges and high schools from across the country are set to compete in the 5th Annual "Great Moon Buggy Race," beginning at 10 a.m. Saturday at the U.S. Space & Rocket Center. NASA Civil Service employees will receive free admission to the Space & Rocket Center on April 18 by presenting their Marshall Center identification badge.
